US Copyright office - Issue No. 1060 - January 29, 2025

“The Office confirms that the use of AI to assist in the process of creation or the inclusion of AI-generated material in a larger human-generated work does not bar copyrightability.”

“...but not the mere provision of prompts.”

BRUSSELS, Feb 12 (Reuters) - The European Commission on Wednesday scrapped draft rules regulating technology patents, AI and consumer privacy on messaging apps...

EU Liability Directive allowed consumers to sue for compensation for harm due to the fault or omission of a provider, developer or user of AI technology

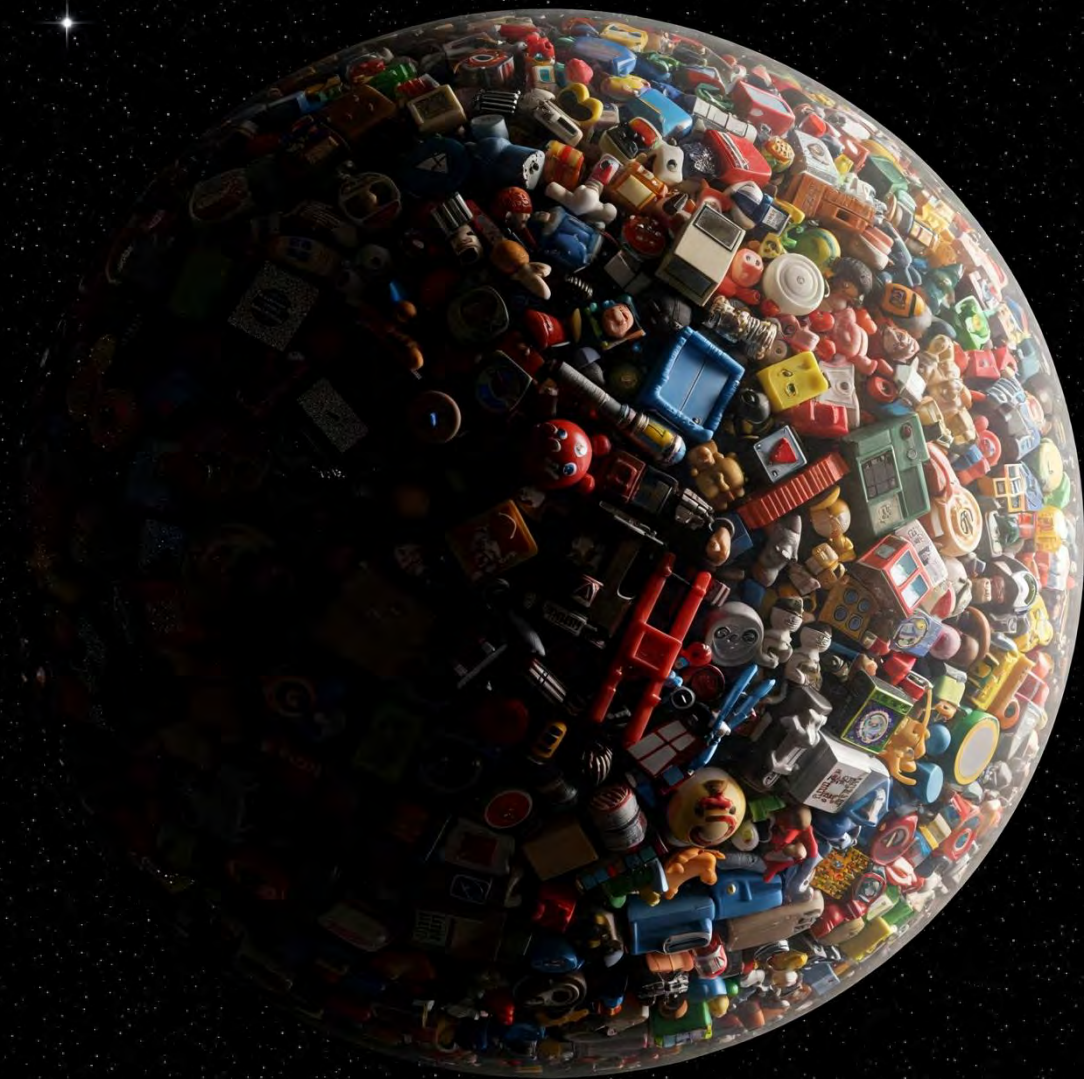

AI Copyright Transparency Act (AB 412) requires developers of generative AI systems to disclose when they use copyrighted materials in their training data.

Right to Information: Requires developers to provide copyright owners with lists of copyrighted materials used to train GenAI systems and models.

Online Request Mechanism: Requires developers to establish a publicly accessible mechanism allowing copyright owners to submit requests for information.

Enforcement: Authorizes copyright owners to bring civil actions against developers who fail to provide required information

The importance of spatial intelligence
cannot be overstated.

It's as fundamental as language, possibly
even more ancient and essential.
