disguise ROI

01

Setup with calibration workflows in hours

02

Save time by making creative changes on set in real-time

03

Separate rendering from LED display

04

Rely on battle hardened software and hardware that run reliably

hardware ecosystem

The disguise hardware is built with in-depth Research & Development, using the best components and technology.

Connect seamlessly with 70+ integrations, scale your production and ensure pixel perfect delivery your show

hardware ecosystem

power to render - rx range: rx, rx ll

Create and render photorealistic, high-quality graphics in real-time

power to scale - vx range: vx 4, vx 2, vx 1, 4x4pro, 2x4pro

Dynamic, high quality video playback

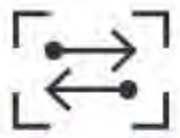

power to respond - gx range: gx 2c, gx 2, gx 1

Flawless quality projection on a massive scale

power to everyone - plus range: solo, 2x2plus

Flexible creation and reliable playback for smaller shows

RenderStream

A continuous, bidirectional data transfer
Connects disguise and non disguise systems to
deliver content with highest accuracy at the
lowest possible latency.

Edit the render
stream layer to
control unreal
